# MARCONI WILDLIFE MANAGEMENT AREA

(Wellfleet)

GENERAL: 1,100 acres of gently rolling land.  
U.S.G.S. Quad: Wellfleet

VEGETATION: Pitch pine and black oak are the most common trees. Huckleberry is a common shrub in the understory. Large areas behind the dunes are dominated by low heathland shrubs such as bearberry and crowberry. The remaining grassland areas and the heathland areas are being invaded by pitch pine.

WATER: A small pond on Fresh Brook is the only standing freshwater on the area.

WILDLIFE: Deer, coyote, fox, rabbits, quail and numerous nongame species. Pheasants are stocked on this area.

SPECIAL  
REGULATIONS: Cape Cod National Seashore regulations limit dog packs to six dogs per hunting party. Also note that a "hunter orange" hat is required wear for hunters during the pheasant/quail season.
